(OpenVZ) and there is possibility to choose Windows Server 2008

or 2012 with our KVM servers.

What payment methods do you accept?

PayPal, Visa, Mastercard, Maestro credit cards, Webmoney,

CashU, Wire transfer and Bitcoins.

Testimonials

Kind words from our valuable customers:

Time4VPS is essentially perfect. Set up is extremely fast, and its exactly what we need at a perfect price. Add to all this the fact that they take Bitcoin, and really, I could not recommend them more strongly. A wonderful service, that provides just the right amount of interaction. Many companies get this wrong, asking for too much information, and making you sign all sorts of worthless paperwork. This service provides what you need to get on with your work. Time4VPS gets not only my money, but my respect and admiration. We need more companies like Time4VPS!

- **A. Fernandez**

Low prices but NOT Low Quality Services. Fast and Friendly support. Speedy servers. As PHP Developer I was always looking to find a hosting company offering such quality services to eliminate the waste of my time trying to fix server issues. That's what I found here. Highly recommended especially to web professionals.

- **Christos**
